Consistency Creates Freedom.

Why this folder sits in **_unregistered**

THECC_INDICATOR_REGISTRY.json has no entry for this product. It carries an open question under **THECC-0008 (FVG Return Filter)**:

"FVGBPR_v1.7.pine sits in the same folder — unclear whether it is a separate product (FVG+BPR) or an ancestor. Resolve before retrofit; may warrant its own ID."

IDs are assigned once and never change, so none was invented. Two related builds exist and the relationship needs an owner decision:

Build	What it is
FVG PRO v2.1	Multi-timeframe FVG engine with volume profiling and Skull Mode, plus market structure, equal highs/lows and liquidity sweeps. The subject of these documents.
SMC FVG/BPR v1.7	Separate script: FVG, weak FVG, Balance Price Range, market structure, liquidity sweeps, equal highs/lows.

The suite

#	Document	ID	State
1	Student Guide	THECC-D0C-FVGPRO-SG	✓ .md · .html · .pdf · .json
2	Instructor Guide	THECC-D0C-FVGPRO-IG	✓

Formats

Format	State
Markdown (master)	✓ every document
HTML	✓ every document
PDF	✓ every document — A4, brand styling, running footer with page numbers
Metadata JSON	✓ Student Guide
Slide outline	✓
Video outline	✓
DOCX	✗ not produced

PDFs are generated by `make_pdf.py` in the repository's `docs/` folder: it renders each `.md` to brand-styled HTML via `render.py`, then prints it through the session's Chromium at A4 with the standard running footer — `THECC Institutional Trader Academy™ · <document> · © THE CONSISTENCY COLLECTIVE · Page N of M`. The current set is 21 files, 147 pages.

DOCX is still outstanding. Either open a `.md` in Google Docs (right-click → **Open with** → **Google Docs** → **File** → **Download** → **.docx**), or run the sanctioned `_render/` pipeline, which also runs `audit.py` for the 0-fail gate.

Publication sequence

1. **Owner assigns the registry ID**, or rules the product an ancestor of THECC-0008.
2. Create `_SOURCE_OF_TRUTH.json` per Academy Documentation Standard §2.
3. Replace "Registry ID pending" across all documents and the metadata JSON.
4. Move this folder to `THECC-NNNN <CODE>` beside the other product folders.
5. Add the product to `_THECC_PRODUCT_CATALOG.md`.
6. Green-check the build on TradingView; then the owner may flip Status to `Production Certified` (§2a).
7. Capture real screenshots, issue the portal QR URLs, render DOCX.

Full checklist: `THECC-DOC-FVGPRO-MC`.

Standard compliance

Requirement	Status
Course Metadata block	✓ every document
Document Control front matter	✓ (Indicator ID pending)
QR code placeholder	✓ placeholder — portal URL not issued
Table of Contents	✓ Student Guide
Callout legend	✓
Exercises + Review Questions per chapter	✓
Certification Quiz at 80%	✓ guide quiz (20) and exam (40)
Revision History · Compatibility · Copyright · footer	✓
Screenshots and diagrams	✗ placeholders
No third-party names in student-facing docs (§7)	✓ verified
Source attribution kept in <code>.pine</code> only (§6a)	✓
Reading level Grade 11–12 (§6)	✓

Requirement	Status
Terminology lock (§8)	✓
Seven formats (§5)	⚠ 6 of 7 — DOCX outstanding

Source build

pine/thecc-fvg-pro-v2.pine , git branch claude/trusting-carson-ggyul4 of the thecc-ai-backend repository. Compile status: **not green-checked**.

Revision History

Version	Date	Author	Change
v2.1.0	2026-09-20	Dale Batise	Index rewritten as the full suite landed: 18 of 20 documents complete, Video Scripts and PowerPoint as outlines, PDF renders delivered for every document, DOCX outstanding.

Educational material only. Not financial advice, not a signal service, and not a claim about future results.
