

THECC Fair Value Gaps PRO — Feature Roadmap

THECC Institutional Trader Academy™

 **Proposals, not commitments.** Nothing in this document is a promised release date or a claim that any item will ship. Items become real only when the owner schedules them.

Course Metadata

Field	Value
Academy	THECC Institutional Trader Academy™
Course	Fair Value Gaps PRO
Module	Operations
Lesson	Roadmap
Difficulty	Instructor / Engineering
Estimated Time	10 minutes
Prerequisites	Developer Guide <code>THECC-D0C-FVGPR0-DG</code>
Indicator Version	v2.1
Document Version	v2.1.0
Last Updated	2026-09-20
Instructor	Dale Batise
Status	Content Complete — Certification Pending

Document control:

Field	Value
Document ID	THECC-DOC-FVGPRO-RM
Document type	Feature Roadmap
Indicator	THECC Fair Value Gaps PRO · Registry ID pending
Version	v2.1.0
Build	2.1.0+2026-09-20
Release date	2026-09-20
Compatible indicator versions	FVG PRO v2.1.x
Academy Doc Standard	v1.0
Edition	Internal Master
Platform	TradingView · Pine Script v6

Consistency Creates Freedom.

0 · Before any new feature

These are not features and they outrank everything below.

Item	Why it blocks
Registry ID assignment	Every document carries "pending" until it is resolved
<code>_SOURCE_OF_TRUTH.json</code>	The factory pipeline reads from it
TradingView compile green-check	No <code>Production Certified</code> stamp without it
Real screenshots and portal QR	The suite ships with placeholders today
DOCX renders	One of the seven required formats is still missing

1 · Candidates, ranked by value per unit of risk

1.1 Zone proximity alert · *low risk*

Alert when price comes within a configurable distance of a live zone, rather than only when a zone forms. The most requested behaviour for a map tool, because a level that formed 200 bars ago is the one you want telling you it is close. **Cost:** one loop over the live zones per bar, two inputs, one alert condition. **Risk:** alert frequency — must default off with a sensible distance unit.

1.2 Zone-touch and midpoint-touch events · *low risk*

Distinguish first touch, midpoint touch and full invalidation, each with its own alert. Teaches the midpoint concept that Chapter 3 already covers. **Cost:** state per zone, three alert conditions. **Risk:** per-zone state grows; no new drawings.

1.3 Higher-timeframe market structure · *high risk*

Run MSS/BOS from a chosen timeframe instead of the chart. **Cost:** `request.security` plus bar-index translation, because structure drawings currently anchor to chart bars. **Risk:** the drawings are the hard part, not the detection. Prototype before promising.

1.4 Session-anchored liquidity levels · *medium risk*

Mark the prior session high and low explicitly, so sweeps reference a named level rather than a rolling lookback window. **Cost:** session detection plus two lines and labels per session. **Risk:** drawing budget on long histories; needs a "sessions kept" cap.

1.5 Zone-age display · *low risk*

Optional bar count or age tag on each zone. Answers "how long has this been unfilled" without counting. **Cost:** text only, no new objects. **Risk:** text clutter at small sizes.

1.6 Per-timeframe styling in Multi-Fix · *low risk*

Distinct colours per timeframe slot rather than by direction only, so overlap reads at a glance. **Cost:** four colour pairs. **Risk:** doubles the Style section; consider a simple "colour by timeframe" toggle instead.

1.7 Compact mode for the zone text · *low risk*

Volume figure without the balance percentage, or tag only, for crowded charts. **Cost:** one input. **Risk:** none material.

2 · Explicitly out of scope

Item	Why
Buy / sell signals, or any direction call	This product is a map. Adding a trigger would break the role split with the execution products and the course's whole argument.
Probability or "strength" grades on zones	The balance percentage is already misread as quality. A score would make that worse and could not be honestly derived.
Position sizing or stop placement	Risk belongs in the trader's plan, not in a context tool.
Automatic settings tuning per symbol	Encourages exactly the behaviour the course prohibits.
More per-zone drawings	Capacity is 125 zones; each new drawing cuts it.

3 · Documentation roadmap

Item	State
Full video scripts from the lesson outline	Outline delivered; scripts outstanding
PowerPoint deck from the slide outline	Outline delivered; deck outstanding
Real chart screenshots and the overlap diagram	Outstanding
DOCX renders of all documents	Outstanding
PDF renders of all documents	Delivered — <code>make_pdf.py</code>
Translated editions	Not planned

Revision History

Version	Date	Author	Change
v2.1.0	2026-09-20	Dale Batise	First Feature Roadmap for Fair Value Gaps PRO v2.1: blocking items, seven ranked candidates with cost and risk, explicit out-of-scope list, documentation roadmap.

Educational material only. Not financial advice, not a signal service, and not a claim about future results.
