Consistency Creates Freedom.

A · Outstanding for this product — do these first

- [] **Assign the registry ID**, or rule the product an ancestor of THECC-0008. The registry raises the question under that entry and IDs are permanent, so this blocks everything else.
- [] Create `_SOURCE_OF_TRUTH.json` per Academy Documentation Standard §2.
- [] Replace **Registry ID pending** in all 16 documents and in the metadata JSON.
- [] Move the Drive folder out of `_unregistered` to `THECC-NNNN <CODE>`.
- [] Add the product to `_THECC_PRODUCT_CATALOG.md` with its doc-suite status.
- [] Run the TradingView compile green-check; record the date.
- [] Capture real screenshots for the 📸 placeholders and the 📊 diagram.
- [] Issue the portal URL and replace the QR placeholders.
- [] Render DOCX for every document (PDF is produced by `make_pdf.py`).
- [] Decide whether the untagged pre-2.0 baseline gets a retrospective version number.

B · Every release

Source

- [] Version bumped in the file header and the `indicator()` title if shown
- [] Change history comment updated at the top of the source
- [] Compile: 0 errors — record the date
- [] Third-party licence attribution still present in the `.pine` comments, and still absent from the UI and the docs
- [] No new third-party name introduced anywhere student-facing

Behaviour

- [] Every new input defaults to existing behavior, or the change is declared breaking in the Release Notes
- [] Auto / Fix / Multi-Fix tested at 1, 3 and 5 active slots
- [] Drawing cost per zone re-counted if any drawing was added — the 125-zone capacity moves with it
- [] Both invalidation methods re-checked against a wick-pierced zone
- [] Sensitivity steps produce monotonically increasing zone counts
- [] Every alert fired once, both routes, gating on and off
- [] Bar Replay: zones still appear only on confirmed bars

Documentation

- [] Knowledge Base `KB-03` defaults table updated first — it is the source every other document quotes
- [] Student Guide, Cheat Sheet, Quick Start regenerated against it
- [] Release Notes and Change Log written before publication, not after
- [] Exam and both answer keys re-checked if any documented number changed
- [] Documentation Index updated with delivered and outstanding documents
- [] `python3 make_pdf.py` run so every `.md` has a current `.html` and `.pdf` at the same version
- [] Consistency audit run; 0 fails

Status

- [] Status line correct in every document: `Content Complete – Certification Pending` until green-checked **and** owner-signed
- [] No document, page or message describes the course as certified before that

C · Quarterly

- [] Re-read the fault tables against real support questions from the quarter; add any new signature
- [] Confirm the drawing-budget guidance still matches TradingView's published limits
- [] Confirm Pine v6 behaviour has not changed for `request.security` , pivots or `alert()`
- [] Spot-check three student journals: are invalidations being written before entries?
- [] Review the roadmap; move or drop anything that has sat untouched for two quarters

D · Sign-off record

Release	Compile green-check	Owner sign-off	Docs regenerated	Audit clean	Notes
v2.1	☐	☐	☐	☐	Registry ID outstanding

Revision History

Version	Date	Author	Change
v2.1.0	2026-09-20	Dale Batise	First Maintenance Checklist for Fair Value Gaps PRO v2.1: outstanding product actions, per-release source, behaviour, documentation and status checks, quarterly review and sign-off record.
