

THECC Fair Value Gaps PRO — Student Workbook

THECC Institutional Trader Academy™

 Course Metadata

Field	Value
Academy	THECC Institutional Trader Academy™
Course	Fair Value Gaps PRO
Module	1–4 (Core Curriculum)
Lesson	Workbook
Difficulty	Beginner → Intermediate
Estimated Time	4 weeks, 20 minutes per session
Prerequisites	Student Guide Chapters 1–5
Indicator Version	v2.1
Document Version	v2.1.0
Last Updated	2026-09-20
Instructor	Dale Batise
Status	Content Complete — Certification Pending

How to use this workbook

Print it, or copy each table into your journal. Complete one page per session. **Nothing in this workbook asks you to take a trade.** It asks you to describe what you see and to name where an idea would be wrong — which is the skill the course is actually teaching.

⚠ If you cannot fill in the *invalidation* column, the observation is incomplete. Leave it blank and move on rather than inventing one.

Week 1 — Setup and vocabulary

1.1 Configuration record

Field	Your value
Symbol	
Chart timeframe	

Field	Your value
Detection mode (Auto / Fix / Multi-Fix)	
Fix or Multi-Fix timeframes	
Detection Sensitivity	
Zone Filtering	
Zone Invalidation	
Zones kept per timeframe	
Date recorded	

1.2 Zone anatomy — three zones

#	Direction	Volume figure	Balance %	What the balance tells me about how it was built
1				
2				
3				

1.3 Vocabulary in my own words

Term	My definition (one sentence, no jargon)
Fair value gap	
Displacement	
Confirmed	
Invalidation	
MSS	
BOS	
Liquidity sweep	

Week 2 — Timeframes and structure

2.1 The Fix experiment

Mode	Zones visible	Did levels move when I changed chart timeframe?
Auto		
Fix on my bias timeframe		

One sentence on which I will trade from, and why:

2.2 Overlap hunt (Multi-Fix)

#	Timeframes marking the same price	Price level	What happened when price arrived
1			
2			
3			

2.3 Structure log — five events

#	MSS or BOS	Level broken	Did it change my bias?	What the next 20 bars did
1				
2				
3				
4				
5				

💡 If most of your MSS events were followed by continuation rather than reversal, you have learned the most useful lesson in the course: a shift says the old direction stopped, not that a new one began.

Week 3 — Liquidity and the sequence

3.1 Sweep log — eight sweeps

#	Side	Level swept	Did an MSS follow?	Outcome over the next 20 bars
1				
2				
3				
4				
5				
6				
7				
8				

Of my eight sweeps, how many were followed by a structure shift? ____ / 8

What that ratio tells me about trading sweeps alone:

3.2 Sequence worksheet — repeat four times

Step	My observation
1 · Map — unfilled zones above and below	
2 · Liquidity — shelves and session extremes	
3 · Sweep — level run, closed back inside	
4 · Shift — MSS in the rejection's direction?	
5 · Level — the zone the shift left	
6 · Invalidation — where this idea is wrong	
7 · Size — does the risk distance fit my limit? Yes / No	
Outcome	

Step	My observation
What I would judge differently next time	

Week 4 — Discipline and review

4.1 Settings discipline log

Date	Setting changed	From → To	Reason	Sessions observed	Keep or revert

⚠ One change at a time. Never during a position.

4.2 Honest self-audit

Question	My answer
Did I ever treat a zone as a reason on its own?	
Did I ever read a sweep label as a direction?	
Did I define invalidation before entry every time?	
Did I open the settings panel while in a position?	
Which of the 25 common mistakes did I make this month?	

4.3 Month-end review

Metric	Count
Sequences observed (all seven steps present)	
Sequences where step 4 never arrived	
Times the drawing budget confused me before I understood it	
Alerts I acted on	

Metric	Count
Alerts I ignored, and why	

The one change I will make next month:

Certification readiness check

Tick honestly. All eight before attempting the quiz.

- ☐ I can state the middle-bar close rule without looking.
- ☐ I can explain why higher sensitivity means more zones.
- ☐ I can read the balance percentage correctly.
- ☐ I can state the difference between MSS and BOS in one sentence each.
- ☐ I can explain why equal levels arrive late and why that is preferable.
- ☐ I can define a buy-side sweep and say which direction it favours.
- ☐ I can recite the seven-step sequence in order.
- ☐ I can explain why size is decided last.
