Why the Drive folder sits in **_unregistered**

`THECC_INDICATOR_REGISTRY.json` has no entry for this product. It carries an open question under **THECC-0008 (FVG Return Filter)**:

"FVGBPR_v1.7.pine sits in the same folder — unclear whether it is a separate product (FVG+BPR) or an ancestor. Resolve before retrofit; may warrant its own ID."

The registry's ID policy is that `THECC-NNNN` is assigned once and never changes, so no ID was invented for these documents. Two related builds exist and the relationship between them needs an owner decision:

Build	What it is
FVG PRO v2.1	Multi-timeframe FVG engine with volume profiling and Skull Mode, plus market structure, equal highs/lows and liquidity sweeps. The subject of these documents.
SMC FVG/BPR v1.7	Separate script: FVG, weak FVG, Balance Price Range, market structure, liquidity sweeps, equal highs/lows.

They share concepts but are different products with different engines.

Required sequence before publication

1. **Owner assigns the registry ID** (or rules the product an ancestor of THECC-0008).
2. Create `_SOURCE_OF_TRUTH.json` for the product, per Academy Documentation Standard §2.
3. Update the ID in every document: front matter, Document Control, and the metadata `.json`.
4. Move the Drive folder to `THECC-NNNN <CODE>` beside the other product folders.
5. Add the product to `_THECC_PRODUCT_CATALOG.md`.
6. Green-check the build on TradingView, then the owner may flip Status to `Production Certified` (§2a).

Delivered documents

Document	ID	Formats
Student Guide	THECC-DOC-FVGPRO-SG	<code>.md</code> (master) · <code>.html</code> · <code>.json</code> metadata · slide outline · video outline
Cheat Sheet	THECC-DOC-FVGPRO-CS	<code>.md</code> (master) · <code>.html</code>

DOCX and PDF are not present. They were not rendered in the authoring session because the authoring container's LibreOffice could not load documents. Produce them by either route:

- Open the `.md` in Google Docs (right-click → Open with → Google Docs), then **File** → **Download** → **.docx / .pdf**; or
- Run the sanctioned `_render/` pipeline, which also runs `audit.py` for the 0-fail consistency gate.

`render.py` in this folder regenerates the `.html` from the `.md` using the Academy brand CSS.

Outstanding documents (18 of the 20-document suite)

Instructor Guide (IG) · Developer Guide (DG) · Quick Start (QS) · FAQ Book (FAQ) · Troubleshooting Manual (TS) · Release Notes (RN) · Change Log (CL) · Knowledge Base (KB) · Video Scripts (VS, full scripts — only the outline exists) · PowerPoint (PPT, deck — only the outline exists) · Certification Exam (EX) · Instructor Answer Key (AK) · Student Workbook (WB) · Practical Exercises (PE) · Live Trading Lab Manual (LM) · Maintenance Checklist (MC) · Feature Roadmap (RM) · Documentation Index (IX — this file covers it for now)

Standard compliance notes

Requirement	Status
Course Metadata block	✓
Document Control front matter	✓ (Indicator ID pending)
QR code placeholder	✓ placeholder only — portal URL not yet issued
Table of Contents	✓
Callout legend	✓
Exercises + Review Questions per chapter	✓
Certification Quiz, 80% pass mark	✓ (answers belong in the AK document)
Revision History · Compatibility · Copyright · footer convention	✓
Screenshots and diagrams	✗ placeholders — real captures required
No third-party names in student-facing docs (§7)	✓ verified
Source-code attribution kept in <code>.pine</code> only (§6a)	✓
Reading level, Grade 11–12 (§6)	✓ authored to target
Terminology lock (§8)	✓ <i>confirmed</i> and <i>repaint</i> used per the standard

Source build

The documented build is `pine/thecc-fvg-pro-v2.pine` in this repository. Compile status: **not green-checked**. Keep the canonical `.pine` wherever the registry's `canonical_source` points once the ID is assigned.
